

Help contribute to a water Purification Project

This mission project is brought to you by Randy Kennard

Living Waters for the World is partnering with Newark Rotary and the Ejido community, Tabi, Quintana Roo, Mexico. There is a strong Geneva Presbytery presence in this effort.

We are reaching out to churches and Rotary groups to help with this effort. There are a few layers of need required. Please pray-fully determine where we can help this community to receive and sustain a water purification system within their community. This way they will not be drinking contaminated water or drive 1-2 hours to purchase purified water.

- Support the project with education supply donations
- Water jug collection
- Buy-A-Part auction - see next page and Link on WPC Website
- Travel to Tabi in February 2022 and assist with installation. Many hands are needed at every skill level. *Please join me.*
- Prayer of support for the implementation, the travel of participants and Prayer for the dear people of Tabi

Map of YUCATAN Peninsula, Mexico

Tabi – site of future water plant

Two buildings to be razed before installation of new water building

Two buildings will be built. One for the water purification system and the other as bathrooms

Buy-A-Part Auction

Log onto website:

<https://www.32auctions.com/Buy-A-Part Tabi MX>

Payments can be made via PayPal or mailed directly to Newark Rotary.

Inside a Water Plant

Buy a part to help in funding this water purification project. Your name will be attached to the donated part and you will be remembered by the Tabi community for this donation.
